

Náthir (نثر)

Name: عبدالمجيد سعود القرشي

February 8, 2025

Project Introduction:

A Project Focused On Designing The User Interface For A Digital Library Application To Enhance The Digital Reading Experience Through Innovative Features And A Responsive, User-Friendly Design.

My Role In The Project:

UI Design And Development:

- Designed All Application Interfaces Using Figma, Focusing On Providing A Smooth And Engaging User Experience.

Prototype Management:

- Developed Interactive Prototypes Showcasing Features Such As Horizontal Scrolling And The Quick Read Button To Ensure Ease Of Use And Seamless Navigation Within The Application.

Accomplished Tasks:

1. Added New Features And Interfaces:

- Login Interface (Log In):
 - Redesigned The Interface For A Seamless User Login Experience With Improved Visual Aesthetics.
- Add List Feature:
 - A Feature Within The "My Library" Interface That Allows Users To Create Custom Lists For Organizing Books.
- Book Lists (List):
 - Designed An Interface Displaying Book Lists Added By Other Users, Allowing For Browsing And Interaction.
- User Profile (Profile User):
 - Displays User Accounts Within The Application, Enabling Interaction By Following Their Lists And Updates.

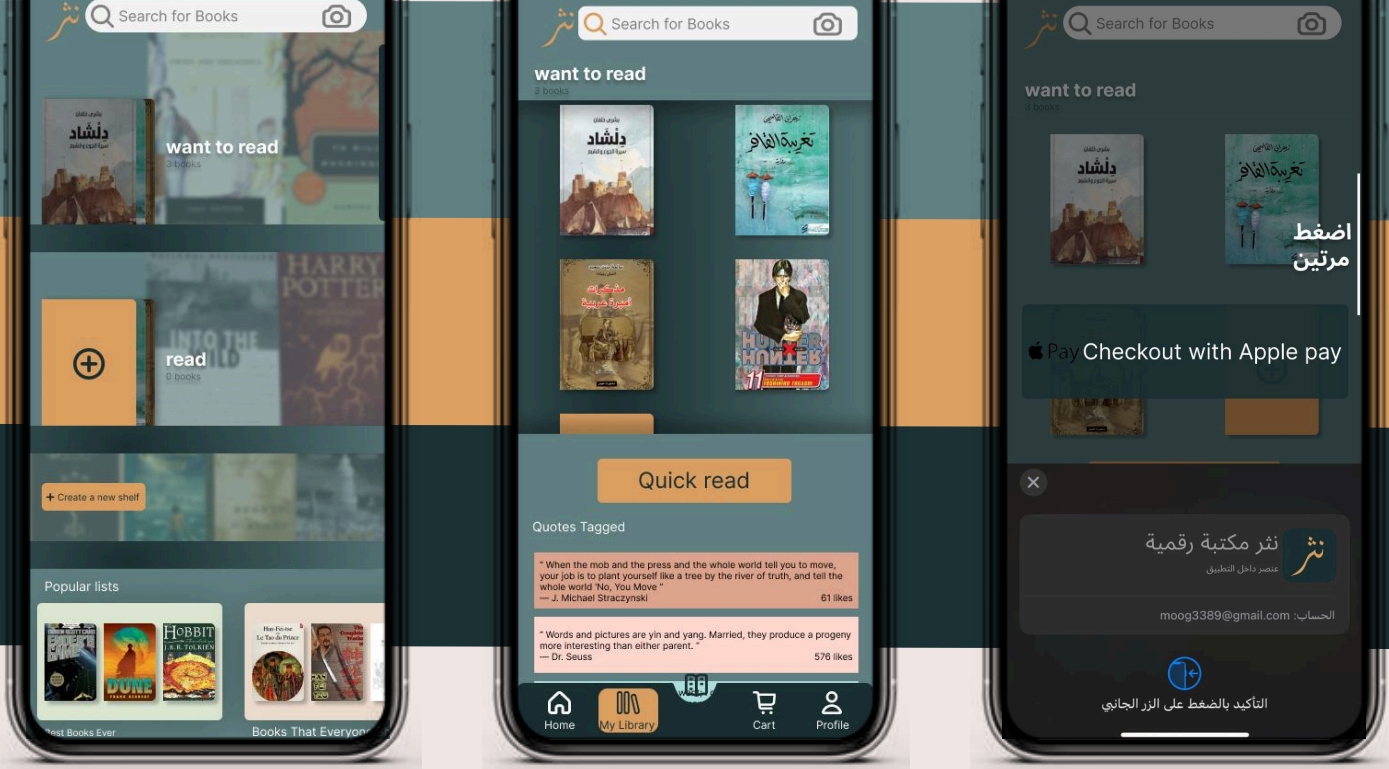

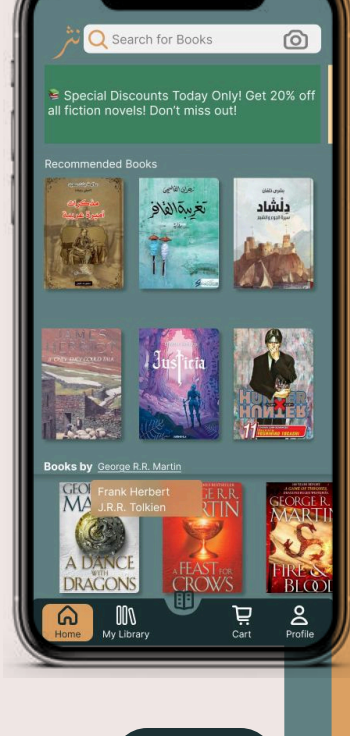

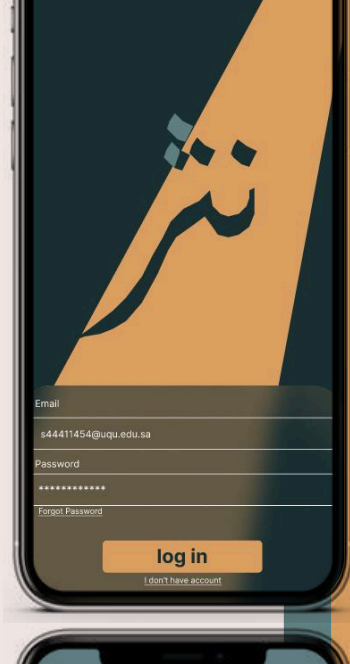

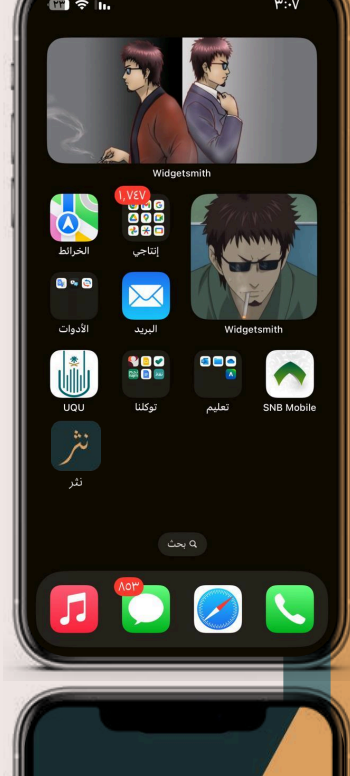

2. Improved Interfaces After Feedback:

- Login (Log In):
 - Updated The Design And Removed Complexity For Easier Access.
- Home Page (Home):
 - Enhanced Colors And Promotional Elements, Such As Discount Banners And Recommended Books.
- My Library Section (My Library):
 - Renamed From "My Books" To "My Library," With An Improved Design And Book Organization Using Horizontal Scrolling.
- Quick Read Feature (Quick Read):
 - Improved Button Design, Reduced Purchase Steps, And Enabled Direct Support For Apple Pay.

3. Customized Reading Features:

- Added Settings To Personalize The Reading Experience, Including:
 - Dark Mode: For A Comfortable Reading Experience In Low-Light Environments.
 - Font Adjustment: Allows Users To Increase Or Decrease Text Size To Suit Their Preferences.

Challenges Faced and Solutions:

- Adding new interfaces while maintaining design consistency:
 - Solution: Used a unified design guideline to ensure consistency in colors and layouts.
- Providing a seamless purchase experience via Quick Read:
 - Solution: Optimized the purchase flow using Apple Pay to minimize required steps.
- Delivering a personalized reading experience:
 - Solution: Developed customizable reading settings, such as dark mode and font size adjustments.
- Enhancing navigation and organization experience:
 - Solution: Implemented features like horizontal scrolling in "My Library" to simplify content interaction.

Conclusion:

The "Náthir" project reflects a comprehensive advancement in mobile UI design. By introducing new interfaces and enhancing interactive features, the application successfully provides a seamless reading and book organization experience for users.

Key Takeaways:

- Striking a balance between aesthetics and usability.
- Leveraging tools like Figma to create a fully interactive user experience.
